LO 1	Identify the pathophysiological mechanisms that may hinder physiotherapy interactions with people living with dementia
LO 2	Discuss and justify the knowledge, skills, behaviours and values which are required by physiotherapists to employ more effective therapeutic intervention strategies for people living with dementia
LO 3	Critically reflect upon professional experience with people living with dementia and analyse the implications of implementing therapeutic interaction
LO 4	Critically evaluate the methods that promote therapeutic interaction that facilitate person centred care with people living with dementia
